Population Over 65 Years Old (As % Of Total Population)

The population over 65 years old is the percentage of the total population that is of the age 65 and older.

Population is based on the de facto definition of population, which counts all residents, regardless of legal status or citizenship, except for refugees not permanently settled in the country of asylum, who are generally considered part of the population of their country of origin.

The share already exceeds 20% of the total population in a number of developed countries (such as Germany, Italy or Japan); on the other hand, there are fewer than 3 citizens older than 65 years for every 100 in Kenya.

HELGI'S POINT OF VIEW

Humans are getting old. They live on average for 32 years in Swaziland and 83 years in Japan. Average life expectancy has grown from around 26 years in the Bronze Age to 48 years in 1955 and 67 years in 2010 and is expected to reach 73 years in 2025.

Share of elderly people (over 65 years old) has already exceeded 15% of population in most developed countries. In Germany, Italy and Japan, the proportion of elderly has increased over 20%, for example while the world's average is estimated at nearly 8%. According to the OECD, future decades will bring an extremely rapid rise in the coming years of the number of elderly and very elderly – estimated for example for Europe at 37% and 54% respectively by 2030 (and 44% and 171% respectively by 2050).

Czechs are no exception. Average life expectancy has increased from 73 years in 1990 to nearly 78 years now and share of people aged over 65 years old is expected to increase from 12.5% to 17% of the total population in 2015.

HELGIHO POINTA

"Data s příběhem"

15. Března, 2013

Česká Republika

Podíl obyvatel ve věku 65 let a více (jako % z celkové populace)

Jde o procentní vyjádření celkové populace ve věku 65 let a více.

Celková populace se počítá z faktické definice populace, která zahrnuje všechny rezidenty bez ohledu na právní postavení nebo státní příslušnost, kromě uprchlíků, kteří permanentně nežijí v zemi poskytnutí azylu a kteří jsou obecně považováni za součást populace v zemi jejich původu.

Podíl už přesahuje 20% z celkové populace v mnoha rozvinutých zemích (např. Německo, Japonsko, Itálie), naproti tomu jsou například v Keni méně než 3 osoby starších 65 let na každých 100 obyvatel.

HELGIHO POINTA

ČESKÁ REPUBLIKA

Celková populace stárne. Lidé se dožívají průměrně 32 let ve Svazisků oproti 83 roků v Japonsku. Střední délka života se zvýšila ze zhruba 26 let z Doby bronzové na 48 let v roce 1955, 67 let v roce 2010 a předpokládá se, že v roce 2025 dosáhne hodnoty 73 let.

Podíl obyvatel starších 65 let již přesáhl 15% celkové populace ve většině rozvinutých zemí. V Německu, Japonsku a Itálii tento poměr již překročil hranici 20% zatímco světový průměr je necelých 8%. Podle OECD přinesou následující desetiletí výrazný nárůst počtu starších a velmi starých lidí - jen v Evropě by mělo dojít do roku 2030 k nárůstu o 37% a respektive 54% (a o 44% a 171% do roku 2050).

Česká republika nebude žádnou výjimkou. Střední délka života se prodloužila ze 73 let v 1990 na současných 78 let a podíl obyvatel starší 65 let by se měl do roku 2015 zvýšit na 17% ze 12.5% v roce 1990.

O PRODUKTU

"Helgiho pointa" je produkt, který se snaží poskytnout zajímavá statistická data jednoduchou formou převážně mediálnímu sektoru. Pokud Vás tato služba zaujme, více naleznete na www.helgilibrary.com/daily. Pokud máte zájem odebírat náš report pravidelně, zaregistrujte se na www.helgilibrary.com/user/register a odebírejte každý den zdarma report společně s přílohou datovým souborem. Pokud budete mít jakékoliv dotazy, návrhy či připomínky, kontaktujte nás prosím na info@helgianalytics.com.
