## HELGI'S POINT OF VIEW

Primary care physicians in the United States make USD 186,000 per year on average versus USD 131,000 in Germany. Orthopedic surgeon pay ranges from a high of USD 442,000 in the United States, to USD 324,000 in the UK, to a relatively parsimonious USD 187,000 per year in Australia, that according to analysis by the United Health Group Foundation.

American physicians seem to be paid the most, on the other hand, they have to repay a lot. Most doctors don't get educated on scholarships alone, so many will need to pay a significant amount of money back in student loans. According to the New England Journal of Medicine, the average cost of medical school in the United States at the beginning of the 21st century, plus living expenses, is approximately USD 140,000 for a public school and USD 225,000 USD for private.

## Průměrná hrubá měsíční mzda lékaře (USD)

Údaje jsou uvedeny pro všeobecné praktické lékaře i specialisty, kteří jsou placeni a pracují v nemocnicích, důraz je kladen tedy především na státní zaměstnance.

## HELGIHO POINTA

Doktor ve Spojených Státech si průměrně vydělá zhruba USD 186,000 za rok oproti USD 131,000 hrubé mzdy doktora v Německu. Plat chirurga na ortopedii může ovšem dosahovat USD 442,000 v USA, USD 324,000 ve Velké Británii či "pouhých" USD 187,000 v Austrálii, podle analýzy vypracované United Health Group Foundation.

I když americký doktor vydělává nejvíce peněz, má co splácet. Většina doktorů nestuduje jen díky stipendiu, spousta z nich musí po studiu splácet vysoké studentské půjčky. Podle New England Journal of Medicine, průměrné náklady na studium medicíny a pokrytí životních nákladů dosahovaly v USA na začátku tohoto tisíciletí zhruba USD 140,000 na státních a USD 225,000 na soukromých školách.

Doktor v České republice si v průměru vydělá téměř 58,000 za měsíc podle údajů ÚZIS. Pokud je to pravda, doktor si vydělá zhruba 2.3x násobek průměrného platu v zemi, což je v souladu se situací v Dánsku či Izraeli.
