Cigarette Consumption Per Capita

Rates of cigarette smoking vary widely, and have changed considerably over the course of history since cigarettes were first widely used in the mid-20th century.

While rates of smoking have levelled off or declined in the developed world over time, they continue to rise in developing nations.

As of 2002, approximately 5.5 trillion cigarettes are produced globally each year and are smoked by over 1.1 billion people or more than one-seventh of the world population.

HELGI'S POINT OF VIEW

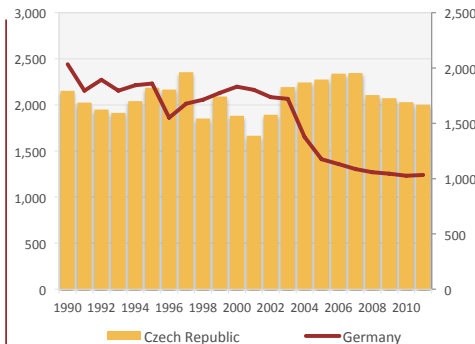

Czechs are not only among the heaviest alcohol consumers in rich Europe, consuming nearly a pint of beer per person a day on average (including babies). They are heavy smokers too.

According to the OECD, a quarter of the population smokes regularly, usually when drinking beer, so no wonder Czechs belong among the biggest addicts within Europe. In 2011, average consumption reached over 2,000 cigarettes per capita, according to the PMI estimates. This puts the Czech Republic among the biggest smokers in the world, together with Greece, Slovenia, Ukraine and Bulgaria.

17 member states have already implemented full bans on indoor smoking within the EU. The strictest of these – which do not permit smoking even in designated ventilated areas – are found in the UK, Bulgaria and Spain. It is mostly in Eastern Europe where smoking in bars and restaurants is still found.

It is time to ban smoking in the Czech Republic!

Spotřeba cigaret na osobu

Míra kouření cigaret se velmi liší a značně se změnila v průběhu dějin, poté co se masově rozšířily v polovině 20. století.

Zatímco míra kouření se v rozvinutém světě postupně ustálila nebo dokonce začala klesat, v rozvojových zemích pokračuje v růstu.

Od roku 2002 se celosvětově vyrobí asi 5.5 bilionu cigaret každý rok a jsou užívány více než 1.1 mld. lidí, což je více než jedna sedmina světové populace.

HELGIHO POINTA

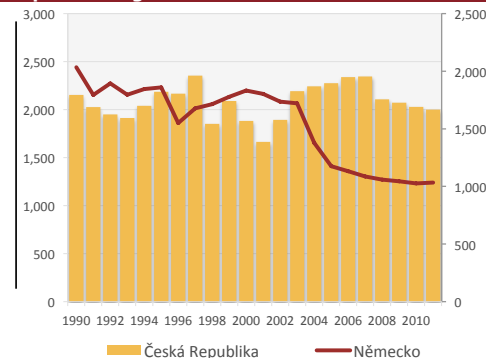

Češi nepatří jenom mezi největší alkoholiky ve vyspělé Evropě, když si dopřávají téměř půllitr piva denně na osobu včetně nemluvňat. Jsou také vášnivými kuřáky.

Podle údajů OECD kouří pravidelně čtvrtina populace, zpravidla v hospodě u piva. Nemůžeme se pak divit, že češi patří mezi největší závisláky v Evropě. V roce 2011 vykoulil každý Čech v průměru přes 2,000 cigaret, podle údajů PMI. To řadí Českou republiku mezi nejintenzivnější kuřáky světa do skupiny s Řeckem, Slovinskem, Ukrajinou a Bulharskem.

Úplný zákaz kouření ve vnitřních prostorách již zavedlo 17 zemí Evropské unie. Ty nejpřísnější - kde je zakázáno kouřit i v odvětrávaných prostorách - jsou k nalezení ve Velké Británii, Bulharsku a Španělsku. Střední Evropa zůstává místem, kde se kuřákům vede stále ještě relativně dobře.

Nastal čas zavést zákaz kouření v českých hospodách!

Spotřeba cigaret na osobu v ČR a Německu

O PRODUKTU

"Helgiho pointa" je produkt, který se snaží poskytnout zajímavá statistická data jednoduchou formou převážně mediálnímu sektoru. Pokud Vás tato služba zaujme, více naleznete na www.helgilibrary.com/daily. Pokud máte zájem odebrat náš report pravidelně, zaregistrujte se na www.helgilibrary.com/user/register a odebírejte každý den zdarma report společně s příloženým datovým souborem. Pokud budete mít jakékoliv dotazy, návrhy či připomínky, kontaktujte nás prosím na info@helgianalytics.com.
