## Pigs Livestock (Total)

Total number of animals which are kept on holdings or otherwise for agricultural production.

Pigs are omnivores and are highly social and intelligent animals. With around 1 billion individuals alive at any time, the domesticated pig is one of the most numerous large mammals on the planet.

The ancestor of the domesticated pig is the wild boar, which is one of the most numerous and widespread large mammals. Its many subspecies are native to all but the harshest climes of continental Eurasia and its islands and Africa as well, from Ireland and India to Japan and north to Siberia. Although it has been exterminated in some areas, its numbers are stable or even increasing rapidly in most of its native range.

Pigs have been domesticated since ancient times in the Old World and as early as 13,000–12,700 BC by New Guineans

## HELG'S POINT OF VIEW

Most of the agricultural production has been falling since the 1990s. The situation has stabilised somewhat since 2004, when the Czech Republic entered the EU (and started receiving subsidies from the CAP); however, the negative trends in terms of production and livestock, as well as employment, continue.

The negative trend is especially visible when a comparison is made with the figures from neighbouring Austria, as seen on the chart on the right.

## Stav prasat (celkem)

Celkový počet zvířat, která jsou chovány v zemědělském podniku nebo jinak pro zemědělskou výrobu.

Prasata jsou všežravci a jsou velmi sociální a inteligentní zvířata. S celkovým počtem okolo 1 mld. žijících prasat (v jakékoliv době) je prase domácí jedním z nejpočetnějších velkých savců na světě. Předchůdce prasete domácího je divoké prase, které je rovněž jedním z nejpočetnějších a nejrozšířenějších velkých savců. Kromě území s nejkrutějším podnebím kontinentální Eurasie a jejich ostrovů a Afriky, většina poddruhů prasete divokého zdomácněla všude na světě, od Irská a Indie až po Japonsko a dokonce i severně od Sibiře. I když bylo v některých oblastech vyhlazeno, množství prasat je stabilní dokonce rychle roste. Prasata byla domestikována od starověku ve Starém světě Novým Guineaný již ve 13. - 12. st. před Kristem.

## HELGHO POINTA

## ČESKÁ REPUBLIKA

Většina zemědělské produkce v České republice klesá od roku 1990, i když se celková situace mírně stabilizovala vstupem do Evropské unie v roce 2004, kdy čeští zemědělci začali pobírat dotace z jednotné zemědělské politiky.

Celkový trend však zůstává negativní ať už se týká stavu zvířat či zemědělské produkce nebo zaměstnanosti v odvětví, především pak pokud srovnáme vývoj se sousedními zeměmi jako je například Rakousko.

## O PRODUKTU

"Helgho pointa" je produkt, který se snaží poskytnout zajímavá statistická data jednoduchou formou převážně mediálnímu sektoru. Pokud Vás tato služba zaujme, více naleznete na [www.helgilibrary.com/daily](http://www.helgilibrary.com/daily). Pokud máte zájem odebírat náš report pravidelně, zaregistrujte se na [www.helgilibrary.com/user/register](http://www.helgilibrary.com/user/register) a odebírejte každý den zdarma report společně s přiloženým datovým souborem. Pokud budete mit jakékoliv dotazy, návrhy či připomínky, kontaktujte nás prosím na [info@helgianalytics.com](mailto:info@helgianalytics.com).

## ABOUT HELGI ANALYTICS

Helgi Analytics is a consulting company based in the Czech Republic. The company mainly provides consultancy in the area of financial services and real estate and focuses primarily on the region of Central and Eastern Europe.

Helgi Analytics also runs a web application called Helgi Library, which is a database/library offering data and analyses on more than 95% of the world's economy and population. The Library aims to bring interesting statistical data and analyses to a wide audience under affordable conditions. If you wish to get more details, please visit [www.helgilibrary.com](http://www.helgilibrary.com) or contact us at [info@helgianalytics.com](mailto:info@helgianalytics.com).
